2. (Previously presented) A data processing system for calculating charges to customers, comprising:

a database, for managing customer data required for calculating said charges to customers;

rule management means, for storing a rule that, in advance, defines a charge calculation method that is employed in accordance with the type of customer service that is rendered;

a discount table, which is described in said rule that defines a charge calculation method, for storing a charge discount ratio that is employed for said charge calculation in accordance with the type of customer service that is rendered, wherein the discount table further includes a set of change point identifiers and associated discount threshold values; and

calculation means, for, in accordance with the contents of said customer data read from said database, obtaining for a pertinent customer, from said rule management means, said rule that defines a charge calculation method, and for calculating a charge by referring to said charge discount ratio defined in said pertinent rule.

3. (Previously presented) The data processing system of claim 2, wherein the rule further defines a desired change point identifier.

4. (Previously added) A method for calculating charges to customers using a data processing computer system, comprising:

BEST AVAILABLE COPY

associating a set of rules with each service type provided by a service provider;

providing a database of customer data, wherein the customer data includes events, and wherein each event belongs to a service type utilized by a customer;

identifying the events belonging to a predetermined customer;

analyzing the events to determine what service types were utilized by the predetermined customer; and

for each service type utilized by the predetermined customer, processing the events belonging to the service type by applying the associated set of rules for the service type.

5. (Previously added) The method of claim 4, wherein the set of rules associated with each service type includes a discount condition rule and a discount calculation rule.

6. (Previously added) The method of claim 5, wherein the set of rules associated with each service type further includes a charge calculation rule.
